

Economic Overview And Outlook: Massachusetts

JOBS

- Across the country, the private sector gained jobs in each month of 2010.
- The President's Council of Economic Advisers estimates that investments made through the Recovery Act have boosted employment in Massachusetts by 79,000 jobs through the 2nd quarter of 2010.
- In Massachusetts, private sector employment fell by 5.4 percent from December 2007 to December 2009. In 2010, private sector employment grew by 2.2 percent.
- In Massachusetts, employees in the construction, manufacturing, and financial activities sectors faced the largest job losses (as a percent of employment within an industry) over the recession. In 2010, the following sectors in Massachusetts experienced the greatest employment increases: leisure and hospitality; other services; and professional and business services.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

How Does Massachusetts Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Massachusetts to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Massachusetts over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Massachusetts.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.
